

Conic Sections: The Parabola

A parabola is set of all points (x, y) that are

Fill in the definition of a parabola

Standard Form of an Equation of a Parabola

A parabola with vertex (h, k) and directrix $y = k - a$ is

(_____ Axis)

For directrix $x = h - a$, the equation is

(_____ Axis)

Fill in the formulas and the axis for each form of a parabola

$$(x-h)^2 = 4a(y-k) \qquad (y-k)^2 = 4a(x-h)$$

The lies on the axis a units (directed distance) from the vertex. The coordinates of the focus are as follows:

$$(h, k + a) \text{ (Vertical Axis)} \qquad (h + a, k) \text{ (Horizontal Axis)}$$

Fill in the blanks

The latus rectum is the chord through a focus parallel to the directrix. **The latus rectum has length**

Graph.

$$(x+2)^2 = 4(y-1)$$

(Vertical Axis)
 $(x-h)^2 = 4a(y-k)$

Draw the graph for EACH parabola

vertex (h,k)
directrix $y = k - a$
Focus: (h, k + a)

Graph.

$$(y+2)^2 = -8(x-1)$$

(Horizontal Axis)
 $(y-k)^2 = 4a(x-h)$

Vertex (h,k)
Directrix: $x = h - a$
Focus: (h + a, k)
